

City of Petersburg

Economic Development Authority Meeting

Regular Meeting Agenda

March 23, 2023

6:00pm

Petersburg Public Library
201 W. Washington Street
Petersburg, VA 23803

1. Call to order – Mr. Samuel Rhue, Chairman
2. Roll call of Board Members
3. Determination of the Presence of a Quorum
4. Moment of Silence
5. Reports/responses to previous public information period
6. Approval of the Minutes- February 23, 2023
7. Financial Report- Mr. Richard, Taylor Secretary /Treasurer
8. Report from the Chairman- Mr. Samuel Rhue
9. New Business –
 - a. Pocahontas Island Small Community Grant- J. Meade R. Anderson, CPG, Brownfields & Voluntary Remediation Program Manager, Virginia Department of Environmental Quality & Joe Morici, Brownfields and Redevelopment
10. Old Business –
 - a. Lease Agreement with Habitat for Humanity- Brian Moore, Director of Economic Development, Planning and Community Development
 - b. Economic Development Report – Brian Moore, Director of Economic Development, Planning and Community Development

11. Business or reports from the Vice Chairman or other members of the EDA Board

12. Public Comments Period

13. Announcements -

a. Next meeting date – April 27, 2023

14. Adjournment

City of Petersburg

Economic Development Authority Meeting

Regular Meeting Minutes

February 23, 2023

6:00pm

Petersburg Public Library
201 W. Washington Street
Petersburg, VA 23803

1. Call to order – Mr. Samuel Rhue, Chairman
2. Roll call of Board Members

Present

Mr. Samuel Rhue-

Mr. Mike Packer

Mr. Richard Taylor

Dr. Lafayette Jefferson

Mr. Winston Sanders

Absent

Mr. Joel Erb

Dr. Ahkinyala Abdullah

3. Determination of the Presence of a Quorum
4. Moment of Silence
5. Reports/responses to previous public information period
None
6. Approval of the Minutes- November 17, 2022

Without objection, Mr. Rhue declared the meeting minutes to be approved with the necessary corrections.

7. Financial Report- Mr. Richard, Taylor Secretary /Treasurer

Mr. Taylor reported that there were no checks written for November, December, and January. The total balance for the accounts is \$100,451.51. There has accrued 68 cents of interest. He stated that he will check on opening a different account to draw more interest.

Mr. Packer moved that the financial report be adopted as read. Mr. Saunders seconded the motion. The motion was carried by unanimous voice vote.

8. Report from the Chairman- Mr. Samuel Rhue

Mr. Rhue stated that he was glad to see everyone. He reported on the following items.

1. VSU announced a program that will help faculty with a housing match of \$10,000 who purchase a home in Petersburg or Ettrick.
2. He attended meetings to discuss the Comprehensive Plan
3. The Board will set up a date to tour the Roper site that is good for everyone.

Mr. Rhue thanked staff for all their hard work.

9. New Business –

- a. Poor Creak RFP Update- Joanne Williams, Director of Communications, Tourism, Marketing & Government Relations

Ms. Williams provided an overview of the Poor Creak RFP. In 2019 the estimate was for \$25 Million. Today it is \$50 million. The City has worked out an agreement with Ampac to place the water tank on their property. The cost of the tank is estimated to be \$8.8 million, and the water mainline is \$17 Million. The line will be a 24-inch line running to a 30-inch line. VEDP gave Phlow \$1.9 million to put in the lines. Phlow is currently over budget by \$500,000 due to inflation.

Congressman McEachen gave the City \$3 million with a \$600,000 match that was waived because the city is considered distressed. Last year the City put in a request to the General Assembly for \$29.5 million and was approved for that amount. In October 2022, the City received \$8 million from the EDA Build Back Better Grant. For 2023, the City is requesting \$11 million, but it will require a \$1 million dollar match. The Governor has put \$5.5 million into his budget for this project. Delegate Taylor has placed a another \$5.5 million in her budget request. The City has put in for a Community Grant that is due

March 10 for \$5.5 million just in case the General Assembly do not approve the budget requests.

Construction will start in 2024 and be complete by 2026 because this is the deadline that all ARPA funds must be spent. City expect to be complete by 2025. JMT will help with the project management. An RFP for design is currently out and has been received. Poor Creek issue has caused 31% and over 200 cares to be underserved because of the issues. Ms. Williams also stated that all funds are on a reimbursement basis. DEQ and DEH have worked it out that if we send them the invoices, the will make payments and float the money for the City.

A capacity study was completed in February 2022 for the EDA Build Back Better Grant and it was based on capacity needed at that time. Civica and Phlow as not online and Berkley estates have built more houses since then.

Mr. Taylor asked how much the project cost. Ms. Williams stated over \$40 million. Mr. Taylor asked what part of Crater Road it is going down. Ms. Williams stated that it would go down by Blandford Church and the cemetery. Mr. Taylor asked what will happen if we don't have the issue fixed by the time the Pharma Cluster comes online. Ms. Williams stated that they will not be able to expand. Dr. Jefferson stated that he could not find the RFP on the website. Ms. Williams stated it has already closed and has been reviewed. Presentations are scheduled for next week for design and engineering. Then an RFP will go out for construction. Mr. Packer asked how long it took to draw the plans. Ms. Williams stated that the consultants are requesting a year, but the City is asking for 8 months. Ms. Williams stated that the City Engineer had left in the midst of the process and this caused a delay in sending out the RFP. The construction timeline for the project is 2 years. The City is considering having more than one company working on the different components of the project to speed the project up. Mr. Sanders asked Ms. Williams to clarify that she stated the design called for a 24 to 30 inch line and is there no reserve capacity? Did the study show this? Ms. Williams stated that the capacity study that was done only looked at the current usage at that time. Mr. Packer asked whether there is a moratorium for economic development in the Poor Creek outfall area. Mr. Moore stated that there is no moratorium and each project is looked at on a case-by-case basis. Mr. Moore stated that the projects that already have connections have been approved because they already have the capacity. It was suggested by Ms. Williams that they have JMT come and review the capacity study that was done to answer questions that the EDA may have.

- b. Lease Agreement with Habitat for Humanity- Brian Moore, Director of Economic Development, Planning and Community Development

Mr. Moore read in the hearing of the EDA Board the lease agreement between the EDA and Habitat for Humanity for the warehouse located at 130 Pocahontas Island. Dr. Jefferson asked about the economic benefit for leasing the site for free. Mr. Taylor and Cynthia Taylor, Virginia Credit Union, elaborated on the work that Habitat does in the Community.

Mr. Taylor asked if the lease states six months or month to month. Mr. Moore stated it is month to month. Mr. Sanders asked is there a termination clause. Mr. Taylor states that either party must give a 30-day notice.

Mr. Taylor moved that the lease agreement be adopted upon City Council approval. Mr. Packer seconded the motion. The motion carried by the following voice vote:

- YES: Mr. Samuel Rhue
Mr. Mike Packer
Mr. Richard Taylor
Mr. Winston Sanders
- NO: Dr. Lafayette Jefferson

Mr. Taylor asked if the Board would allow Tanner Collings, Executive Director of Bizwork to make a brief overview of its business.

c. BizWork- Tanner Collings, Executive Director

Mr. Tanner provided an overview of BizWork and its business building and the support resources it offers for small businesses. He stated that it offers services on two platforms; a small microbusiness incubator and warehouse space which is currently at capacity. He stated that some of its partners are the Chesterfield Chamber, Towne Bank, Wells Fargo, SBDC, and VSU School of Entrepreneurship. It also has started a program called Start Smart in Spanish. There are currently 19 businesses in this program, and the Hispanic Chamber is a sponsor for this.

Mr. Taylor stated that this program offers businesses a start and a good foundation. He believes the Roper site will be a great satellite location.

10. Old Business –

a. SCWWA Update – Robert Wilson, ARWA/ SCWWA Executive Director

Mr. Wilson stated the grant that SCWWA received was for \$83-86 million. The lowest bid that they received was for \$215 million. SCWWA has modified the scope of work and is seeking more state funds. SCWWA has discussed doing the jobs in phases to be completed by 2028.

b. LISC Virginia Update- George Piazza, Program Officer, Economic Development.

Mr. Piazza provided a presentation an overview of the proposed Revolving Loan Fund that will be administered by LISC. He elaborated on the KIVA Loan program administered by the Metropolitan Business League. He

discussed the Tri-Cities Small Business Capital Access Program that is funded by DHCD. Mr. Piazza reported that LISC received 11 applications with six being from Petersburg. One application has been approved for \$50,000, and there are three in progress.

- c. Economic Development Report – Brian Moore, Director of Economic Development, Planning and Community Development

Mr. Moore reported that the staff is working with Finance to identify the budget line item for \$250,000 for the EDA. Once identified, staff will submit the check request on the EDA's behalf.

11. Business or reports from the Vice Chairman or other members of the EDA Board-
none.

12. Public Comments Period- none

13. Announcements -

- a. Next meeting date – March 23, 2023

14. Adjournment

EPA Small Community Grant Assistance – FY2023
Proposal – City of Petersburg, Community of Pocahontas Island
Virginia Department of Environmental Quality
December 16, 2021

Funding Amount Requested: \$20,000.00

Target Communities/Area: This funding request is focused on bringing technical assistance, research, and training intended to facilitate the revitalization of brownfields sites in the community of Pocahontas Island within the City of Petersburg, Virginia. Like many small cities in Virginia, the changing economy has left them struggling to replace commercial and industrial job losses and looking to revitalize their community by creating a new economy to assure the survival of the Pocahontas Island neighborhood. Petersburg and Pocahontas have easy access to Interstate 95 as well as Route 1 and several other major highways; however, success has bypassed this area. Even within the larger Community of Petersburg, the important Pocahontas Island community is often forgotten or left behind.

Pocahontas Island is a unique and somewhat isolated community in a heavily urbanized landscape. The community is reported to be first predominately free African American community in Virginia and one of the largest in the nation prior to the Civil War. Pocahontas Island, originally platted in 1749, was once lined with wharfs and warehouses to serve the bateaus, bringing tobacco and other agriculture products eastward, as they met the ships, bringing in goods and hauling out the agriculture products. Later, multiple rail lines crossed the community, continuing its use as a hub for transportation of goods. The channel to the Appomattox River changed course with floods in 1910 and 1920, moving from the southside to the northside of the community, and several of the rail lines ceased operation over the recent decades, bringing vast changes to the community. Several industrial and commercial businesses continued to operate; however, by approximately 2000, they were shut down and the properties were left vacant, including a lumber company which occupied a significant portion of the proposed project area. Today the population of the Island is reported at 91 with less than 60 residential homes remaining. The majority of the land and nearly all the commercially zoned property is owned by the City of Petersburg or the Economic Development Authority of the City of Petersburg. The City also has much of the waterfront property on both the south and north sides, which is currently open space or has some park amenities which require further investment and maintenance. Interstate 95 divides Pocahontas Island, and east of the interstate is the South Central Wastewater Authority (sewage treatment plant) for Petersburg. The Pocahontas Island Historic District was listed on the National Register of Historic Places on November 3, 2006.

The population of this community is 93, meeting the definition of small community and median household income is well below the definition of a disadvantaged community. The EJ Screen reports (attached) further confirm this status. The City of Petersburg, population of 31,246, has demographic and environmental justice indicators as well that meet the definition on a disadvantaged community. Additionally, 91% of residences are renter-occupied housing and only 6 houses are owner-occupied. An alarming 45% are not in labor force, but 86% are working-age (18-65).

Demographic Data

Locality	Population	Per Capita Income	State Per Capita Income	% of State Per Capita Income
Community of Pocahontas Island	93	\$22,173	\$37,763	58.7%
City of Petersburg	31,246	\$22,448	\$37,763	59.4%

Description of Project:

Virginia DEQ has already initiated outreach in Petersburg by email and telephone discussions with key local officials to discuss their Brownfields needs in Pocahontas. DEQ staff have also had discussions with a local non-profit and a developer who has substantial experience with brownfields in the City as well as across Virginia. Significant land in and surrounding this community has prior commercial and industrial development and clearly meets the definition of a brownfield. The brownfield properties are equally divided between the lumber company, which has 20th century abandoned structures remaining in place, and vacant land, which has all historic structures removed. The challenges facing the community will be planning for the future use, managing brownfield issues, and working with the citizens, keeping in mind needs of the community as well as the National Register of Places designation. Most of the redevelopment interest in Petersburg has been southeast of Pocahontas Island in the Old Town area which has numerous historic buildings. The community wishes to leverage those successful redevelopments to facilitate the reuse of the brownfield sites on Pocahontas Island, while also strengthening, not overtaking, the historic African American neighborhood.

Engaging this community in the discussion focused on long-forgotten brownfields will help create a vision for the future centered around unlocking opportunities on those sites, while preserving the history and honoring the resiliency of the community.

Key Activities:

Community Outreach – Development of steering committee to assure resources are spent in accordance with a shared community vision. The community will be engaged to help guide the process and build brownfields champions to carry the brownfields program beyond this assistance.

1. Brownfields Inventory/Research – Development of a geospatial database layer to capture all of the potential brownfields sites in the targeted community and adjacent areas.

2. Technical Assistance – DEQ and their contractor will provide technical assistance to each community will help the steering committee prioritize sites and maximize the impact to area. This assistance may include area wide planning, remedial planning, and/or redevelopment planning. The DEQ contractor can provide all of those services.
3. Building Partnerships – DEQ and their contractor will help build lasting partnerships create an engaged community group that will carry the brownfields program forward and leverage additional state and federal funding.

Expected Outcomes within one year:

1. Establishment of a steering committee and stakeholder group that will take the revitalization beyond the initial brownfields investment.
2. Conduct one to three community outreach meetings.
3. Develop a Brownfields Inventory in a geospatial database that can be utilized and maintained by the locality moving forward.
4. Produce a “path forward” document for the target communities to guide their brownfields revitalization visions.
5. Application for additional state and federal brownfields grant resources to advance the brownfields program and stimulate redevelopment of a project within the community.

Who will conduct the work?

DEQ with their contractor will conduct the work to be funded by this grant. DEQ will work closely with local partners and stakeholders.

Additional Resources Needed:

No additional monetary resources area needed. However, it is anticipated that a collaborative team of stakeholders will be needed to create a new path forward in the community

Why the additional funding is necessary?

The 128(a) funding that is currently provided to DEQ is not sufficient to support the existing demand for the Brownfields and Voluntary Remediation Programs. DEQ strives through our Brownfields Individualized Outreach program to reach small, disadvantaged communities across the Commonwealth; however, with limited staff and funding, it is not feasible to provide the detailed assistance that small communities with the greatest need require. This funding will allow DEQ to use their specialized contractor to bring brownfields assistance to communities where one major project can be a game changer.

Demonstration of Community Support:

DEQ has been in ongoing discussions regarding this opportunity with the City of Petersburg, who is excited about the opportunity that this Brownfields funding will provide for this community. In addition, DEQ will partner with the Little Cities Foundation, the Pocahontas Island Museum Director, as well as other community members and groups to assure the voice of the community is reflected in the outcome.

Budget: See Attached

EJ Index for RMP Proximity	95	92	86
EJ Index for Hazardous Waste Proximity	91	89	83
EJ Index for Wastewater Discharge Indicator	98	94	91

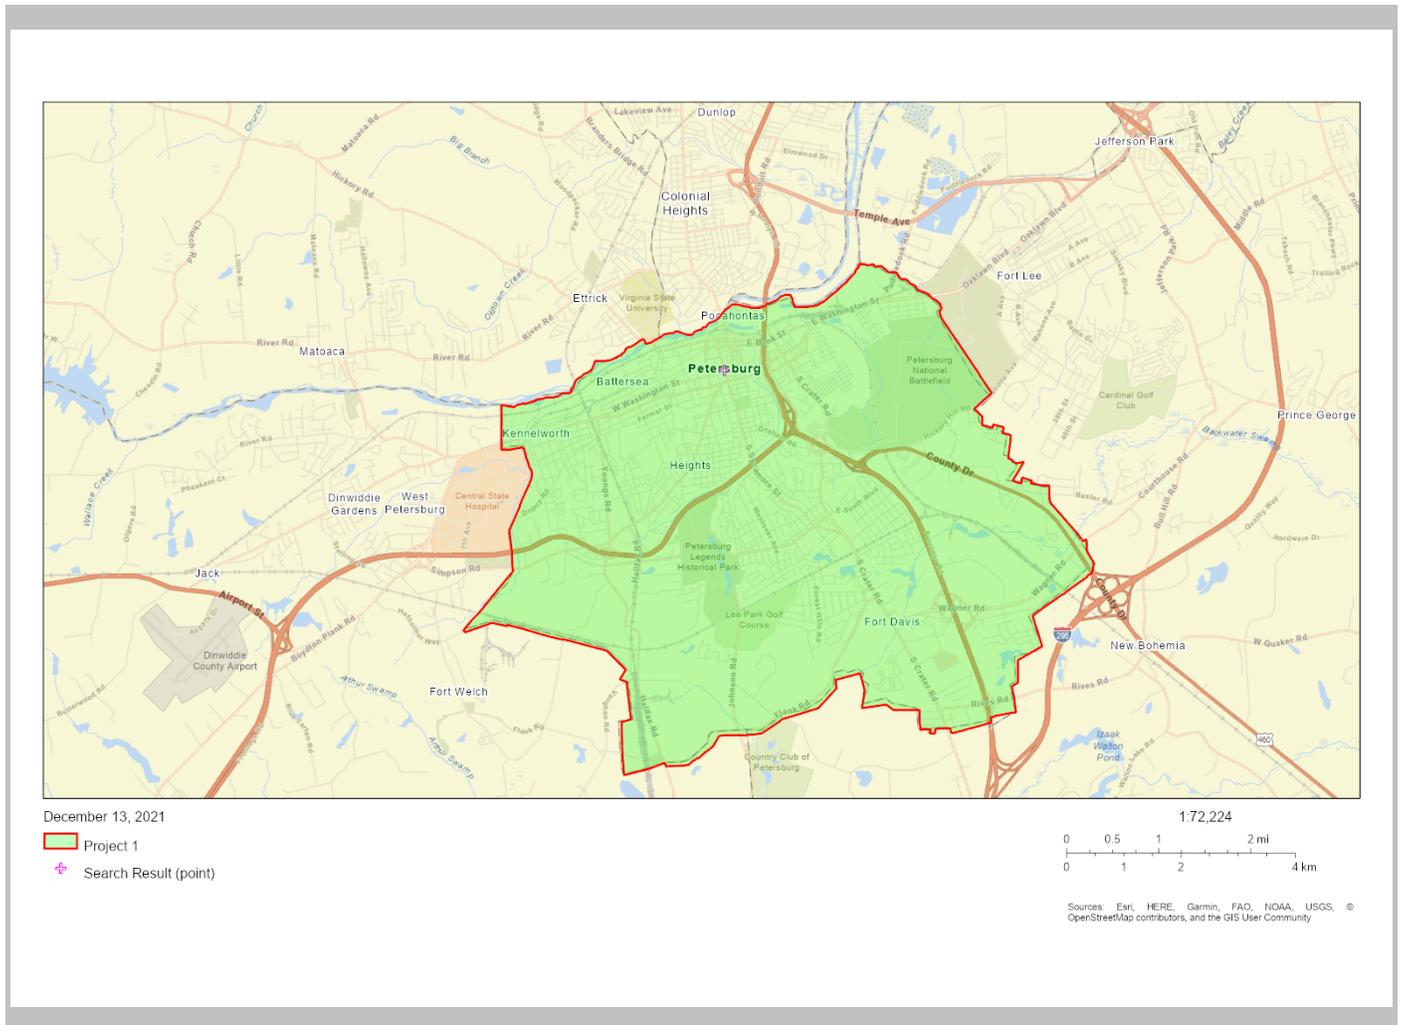

This report shows the values for environmental and demographic indicators and EJSCREEN indexes. It shows environmental and demographic raw data (e.g., the estimated concentration of ozone in the air), and also shows what percentile each raw data value represents. These percentiles provide perspective on how the selected block group or buffer area compares to the entire state, EPA region, or nation. For example, if a given location is at the 95th percentile nationwide, this means that only 5 percent of the US population has a higher block group value than the average person in the location being analyzed. The years for which the data are available, and the methods used, vary across these indicators. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports.

* The National-Scale Air Toxics Assessment (NATA) is EPA's ongoing, comprehensive evaluation of air toxics in the United States. EPA developed the NATA to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that NATA provides broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. More information on the NATA analysis can be found at: <https://www.epa.gov/national-air-toxics-assessment>.

For additional information, see: www.epa.gov/environmentaljustice

EJSCREEN is a screening tool for pre-decisional use only. It can help identify areas that may warrant additional consideration, analysis, or outreach. It does not provide a basis for decision-making, but it may help identify potential areas of EJ concern. Users should keep in mind that screening tools are subject to substantial uncertainty in their demographic and environmental data, particularly when looking at small geographic areas. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports. This screening tool does not provide data on every environmental impact and demographic factor that may be relevant to a particular location. EJSCREEN outputs should be supplemented with additional information and local knowledge before taking any action to address potential EJ concerns.
